

Miao Chen

Graduate Student in Physics | School of Physics and Astronomy, Beijing Normal University
Key Laboratory of Multiscale Spin Physics, Ministry of Education, Beijing Normal University
Email: YOUR_EMAIL@mail.bnu.edu.cn

Google Scholar: scholar.google.com/citations?user=HqSndnwAAAAJ ORCID: YOUR-ORCID

Last updated: May 2026

Research Interests

Non-equilibrium statistical physics; dynamic hysteresis and first-order phase transitions; finite-time and finite-size scaling; information thermodynamics; quantum many-body theory and conformal field theory.

Education

20XX–present Graduate Student in Physics, Beijing Normal University, Beijing, China.
Advisor: Prof. Yu-Han Ma.

20XX–20XX B.S. in Physics, University Name, City, Country.

Research Experience

20XX–present Graduate Researcher, School of Physics and Astronomy, Beijing Normal University.
Research on non-equilibrium dynamics, dynamic hysteresis, coercivity landscapes, finite-time/finite-size scaling, and information thermodynamics.

Publications

An asterisk (*) denotes equal contribution.

Manuscripts and Preprints

- Add preprints under review, manuscripts in preparation, or conference proceedings here.

Selected Presentations

- “Presentation Title,” Conference or Seminar Name, Institution, City, Country, Month Year.
- “Presentation Title,” Conference or Seminar Name, Institution, City, Country, Month Year.

Honors and Awards

- Award Name, Institution, Year.
- Scholarship or Fellowship Name, Institution, Year.

Teaching Experience

- Teaching Assistant, Course Name, Beijing Normal University, Semester Year.

Technical Skills

Programming	Python, MATLAB, LaTeX. Add C/C++, Julia, Mathematica, or other tools if applicable.
Methods	Stochastic simulations, finite-size scaling analysis, numerical solution of dynamical equations, data visualization.
